

FOR IMMEDIATE RELEASE

Ontario Canada, August 9, 2023

ReNeuvo Group Inc. has been invited to attend Ontario Cleantech Mission to Green Expo Mexico September 04-08, 2023.

We are excited to announce that ReNeuvo Group Inc. has been invited to attend the Cleantech Mission to Green Expo Mexico September 04-08, 2023. Miguel Angel Veloz Hernandez, VP Marketing & Sales Mexico has received the honour to represent ReNeuvo's Group Inc. For any information about ReNeuvo or the XyloX product, please contact Miguel at mveloz@renewogroup.com.

ReNeuvo's Group of companies has been in the business for several years and we will be sharing new, exciting developments within the automotive and TPE industry.

The increase demand in the automotive, packaging and others manufacturing industry has created an opportunity for ReNeuvo to drive sustainability in an impactful, meaningful way. Our core value is aimed at carbon emission reduction by incorporating recycled tire reprocessed rubber crumb and reprocessed post-industrial and post-consumer recycled plastics as a substitute for TPE made from virgin materials. TPE usage applications has increased exponentially because of high usage of parts made from plastic.

"We are elated to be invited and to sit alongside key industry players and global experts. We look forward to sharing new insights and learning from senior level, innovative, forward thinking industry professionals."

THE SUSTAINABLE INDUSTRY GROWTH

On its 30th anniversary, THE GREEN EXPO® brings together major international brands presenting their state-of-the-art technology and innovative solutions for the environmental, clean energy and renewable energy sectors.

The road to a sustainable and circular value chain, TPE market review and outlook, From waste to resource, TPEs from recycled materials today, tomorrow and the future, Advancements in green and bio-based materials and Innovative materials and applications.
